

Amendments to the Specification:

Please replace paragraph [24] with the following amended paragraph:

[24] “Application program” - Typically a complete, self-contained program that performs a specific function directly for the user. This is in contrast to system software, such as the operating system, which supports application programs. Various types of application programs are known in the art, such as spreadsheet programs, word processing programs, email management programs, scheduling or calendar programs, drawing programs, painting programs, document or file management programs, internet access and browsing programs, etc.

Please replace paragraph [51] with the following amended paragraph:

[51] As shown in Fig. 4, the file name (or document title “Flight Info”) 402 appears in electronic ink format each place that it appears in the display 400 (as it also does in item 302 in Fig. 3). Additionally, as in Fig. 3, the “author name” associated with this document is displayed in the preview panel of Fig. 4 in electronic ink format (as shown at reference number 404). Additionally, in the illustrated example, electronic ink comments 406 have been provided and associated with this file. A separate panel 408 in the display 400 allows the user to view (or preview) the actual content of the document without the need to open it. Of course, any suitable or desired information may be displayed in the preview screen 400 without departing from the invention (such as file size, creation date, last edit date, edit history, last viewing, parties editing or viewing, etc.). Additionally, any suitable or desired functions may be accessible through the preview screen 400 without departing from the invention, including, for example, the various functions illustrated by icons 410 in Fig. 4.
